Home automation is computer control of home devices, typically electrical. Using inexpensive hardware and open source software, it is possible to programatically control many devices in your home, providing ease and enjoyment for your family.
Outline

1. What is computerized automation?
2. Evaluating technologies
3. Sample deployment
4. Device programming basics
5. What is success?
6. Home automation applications
1. What Is Computerized Automation?
Non-Programmatic Automation

- Timers
- Clapper
- Dawn/Dusk Sensors
- Motion Sensors
Programmatic Automation

- Device behavior can be combined
- No distance limitations
- Activity detection
- Fully programmable / scriptable
- Access to external data
2. Evaluating Technologies: Home Networks

- Wired telephone
- Cordless telephone (900MHz, 2.4GHz, 5.8 GHz, 1.9GHz)
- Wired local area network (Ethernet)
- Wireless local area network (802.11)
- Electrical
- New wireless networks
Home Network Choices

- **Power Line Control (PLC)**
  - X10: signal transmitted at 60 Hz zero-crossings (120 kHz)
  - Universal Power Bus (UPB): out-of-band signal (4–40 kHz)
- **Radio frequency (wireless)**
  - Z-Wave: 900 MHz
  - Zigbee: 900 MHz and 2.4GHz (IEEE standard 802.15.4)
- **Hybrid**
  - Insteon: out-of-band PLC (131 kHz) and radio frequency (900MHz), plus X10 support, [https://www.theverge.com/2022/6/9/23161803/insteon-customers-bought-company-restored-service](https://www.theverge.com/2022/6/9/23161803/insteon-customers-bought-company-restored-service)
Choosing a Home Network Technology

- Open source computer control
  - heyu supports X10
  - MisterHouse (Perl-based) supports all listed technologies
- Availability of devices
  - electrical plug control
  - wireless remotes
  - chimes
  - sensors
  - doors, locks
  - thermostats/HVAC
  - 220-volt control
- Signal reliability (X10 is the worst)
- Technology longevity (X10’s future is uncertain)
- Simplicity of device replacement
- Cost
- External/cloud dependency, privacy
3. Sample Deployment: X10, Electrical Signal Basics, 60 Hertz

http://www.pcguide.com/ref/power/ext/basicsACDC-c.html
Adding A Signal

http://www.pcguide.com/ref/power/ext/basicsACDC-c.html and following

Figure 2
Immediately after a “Start Code”, 
a “Letter Code” is sent. (4 cycles)

Figure 3
Oscilloscope Showing Zero

Figure 4
Oscilloscope Showing One

Figure 5
X10 is an international and open industry standard for communication among electronic devices used for home automation.

- Designed in 1975 by Pico Electronics of Glenrothes, Scotland
- Uses a 120 kHz carrier transmitted as bursts during the relatively quiet zero crossings of the 60 Hz AC alternating current waveform
- One bit is transmitted per zero crossing
- 120 bits per second transmission rate
- 256 maximum device codes
- 16 house codes, A–P; 16 devices per house code, 1–16

X10 Protocol

- Status-on: 1 1 0 1 1
- Status-off: 1 1 1 0 1
- Status Request: 1 1 1 1 1

**FIGURE 4**
X10 Limitations

- Requires 0.75 seconds to transmit a command
- Poor propagation in split-phase electricity distribution
- Affected by line noise from other devices
- Affected by X10 signals from other buildings
The Split-Phase Electricity Distribution Problem

Figure 3-2. Circuit balancing

Allowing Split-Phase Electricity Distribution Propagation, With Amplification
Phase Coupling

Reducing Line Noise

I need to use this because my UPS dampens X10 signals. You also might want to block X10 signals from coming into your house, or you can use unique house codes.
Wall Switch
Flat Switch
Three-way switches are difficult to install because the X10 detection module must be on the power side of the switch, not the ground side; see http://www.hometoys.com/htinews/dec97/articles/kingery/kingery6.htm.
Wireless Wall Switch
Wireless Receiver
Wireless Remote
Lamp/Appliance Control
The pool pump runs longer when the weather is warmer. The server gets the outside air temperature from a weather web site and turns the pool pump on and off at the proper times.
NAME
  heyu - control program for the X10 CM11A serial interface

SYNOPSIS
  heyu address unit-specifier
  heyu date
  heyu erase
  heyu function unit-specifier state
  heyu info
  heyu help
  heyu monitor
  heyu preset unit-specifier preset-dim
  heyu reset [housecode]
  heyu setclock
  heyu status [unit-specifier]
  heyu stop
  heyu turn unit-specifier state [amount]
  heyu upload [check]
  heyu version
Computer/Power Line Interface
7/6 at 05:40:49 address unit 8 : housecode d (entrymotion_dusk)
7/6 at 05:40:49 function Off : housecode d unit 8 (entrymotion_dusk)
7/6 at 20:35:57 address unit 8 : housecode d (entrymotion_dusk)
7/6 at 20:35:57 function On : housecode d unit 8 (entrymotion_dusk)
7/6 at 22:05:46 address unit 3 : housecode f (catherine)
7/6 at 22:05:46 function Off : housecode f unit 3 (catherine)
7/5 at 23:18:20 address unit 13 : housecode i (remotebed2)
7/5 at 23:18:21 function Off : housecode i unit 13 (remotebed2)
x10 monitor | while read LINE
do
  echo "$LINE" >>/var/log/x10
  case "$LINE" in
    *" Off : "*"(remotebed)"*)
      x10off $(x10group 1 | egrep -v '^entrytable$')
      ;;
    # is it dusk?
    *" On : "*"(entrymotion_dusk)"*)
      if [ -f /u/x10/wait_for_dusk ]
        then rm /u/x10/wait_for_dusk
        x10on 1
        echo "x10on masterbath laundry" | at now +45 minutes
      fi
      ;;
    *" On : "*"(kitchen_chime"*)"*)
      say "We are ready to eat."

      sleep 2
      ;;
  esac
  done
4. Device Programming Basics: Software Control

Input

Program

Output
Inputs

- User commands
- Clock/Timer
- Dawn/Dusk sensors
- Wireless remotes
- Caller Id
- Telephone Dialing
- Web sites, e.g., outside temperature
Outputs

- Lights
- Motors
- Appliances, e.g., coffee maker
- Sounds
- Network broadcast messages
- Slideshow
Sample Application: Dusk

- X10 switch, which allows manual or remote operation, turns on lights (45 minutes later)
- Bridge to other circuit
- Receive signal and turn on interior lights
- Receive wireless signal and transmit across circuit
- Turn on interior lights and set cron to turn on outside lights in 45 minutes
- Send signal to turn on lights
- Read signal and send to computer
- Sense sunset (wireless)
5. What Is Success?

• Adding home automation changes your family’s home environment
• Start slow; make incremental changes
• Accept that some home automation tasks are impossible
• You have succeeded when a family member asks for a home automation addition
Challenges

- Change
- Reliable operation
- Device longevity
- Maintenance
- Cost, coordination server
- Security/privacy

6. Home Automation Applications: Telephone Interface
Telephone Logging

AT#CID=1
Wed Jul 8 21:34:00 EDT 2009 DATE = 0708
Wed Jul 8 21:34:00 EDT 2009 TIME = 2134
Wed Jul 8 21:34:00 EDT 2009 NMBR = 6107429657
Wed Jul 8 21:34:00 EDT 2009 NAME = PENNSYLVANIA

Lookup phone number in contact directory.

Wed Jul 8 21:34:04 EDT 2009 Bruce and Christine Momjian
from Bruce's cell phone (610) 742-9657

Optionally sound X10 chime if phone call is from an important phone number.
Telephone Dialing

Dial phone number from contact directory:

ATDT16107429657

Tue Apr 7 14:57:26 EDT 2009 16107429657 Bruce and Christine Momjian to Bruce's cell phone

This can also be used to automatically dial recently received calls using the log.
Telephone Notification

Call Notification

Caller ID (via modem)

caller_id daemon

Broadcast Message

Call Chime (optional)

Logfile

Numbers/Names from Contact Directory
Outgoing Calls

User Command → dial script → Outgoing Call

Numbers/Names from Telephone Directory
Home Application: First Floor

- Garage
- Bedroom
- Hallway
- Kitchen
- Family Room
- Dining Room
- Entry
- Living
- Office
- Computer
- Computer/Power Line Interface
- Coffee Maker
- Screen
- Chime
- Wireless Remote
- Light
- Dawn/Dusk Sensor
Home Application: Second Floor

- Pool Pump (outside)
- Wireless Remote
- Chime
- Bedroom
- Bedroom
- Hallway
- Play
- Light
Heyu

X10 devices are controlled and monitored using the X10 CM11a computer interface device and the open source *heyu* control software. For heyu information, see [http://www.heyu.org/](http://www.heyu.org/). Heyu can be customized by defining devices in `~/.x10config`:

```
remotebed   I 1    # downstairs remote alloff
entrytable  I 2
bookcase    I 3

couch       I 4

tiffany     I 5

schoolroom  I 6

fireplace   I 7

laundry     I 8

wireless    I 9    # wireless outlet, makes click noise

masterbed   I 10
...
```
Instead of:
   $ heyu turn couch on

A script can be created:
   $ x10on couch

The script can handle multiple devices:
   $ x10on tiffany bookcase

And groups of devices can be defined:
   $ x10off video
Simple Time-Based Activity

Time → cron → Output
Crontab Scheduler

0 7 * * *    root x10on slideshow
0 11 * * *    root x10on decor
0 12 * * *    root touch /u/x10/wait_for_dusk
0 14 * * *    root x10on bathroom
30 20 * * *    root x10on boyscolor catherine

# fade
30 21 * * *    root x10dim entrytable decor bathroom

# off
0 21 * * *    root x10off bookcase
0 23 * * *    root frontlights off; x10off decor tiffany
0 0 * * *    root x10off `x10group 1 | egrep -v '^[entrytable]'`
0 0 * * *    root touch /u/x10/wait_for_dawn
59 0 * * *    root x10dimoff_slow laundry
59 1 * * *    root ! is_tz_fallback && x10alloff
Dawn/Dusk Activity

Dawn/Dusk Sensor (via X10) → x10monitor daemon → Outside Lights On +30 minutes → Inside Lights On
Acting on Events (Dusk)

x10 monitor | while read LINE
do
  echo "$LINE" >>/var/log/x10
  case "$LINE" in
    *" On : "*(entrymotion_dusk)*")
      if [ -f /u/x10/wait_for_dusk ]
    then
      rm /u/x10/wait_for_dusk
      x10on 1
      echo "heyu turn masterbath on; heyu turn laundry on" |
        at now +45 minutes
    fi
  ;;
X10 Already Supports Wireless Remotes
Coffee Maker
Coffee Maker Timer

```
" On : "*"(coffeepot"*"))*
  echo "heyu turn coffeepot off" | at now +15 minutes
```

Wireless Remote (via X10) ➔ x10monitor ➔ Coffee Maker Off

+15 minutes
Smartphone Coffee Control
Implementing Smartphone Coffee Control

1. Install an SSH client on the smartphone (VX Connectbot)
2. Setup an SSH key to avoid password prompting
3. Use *post-log automation* to issue the *heyu* shell command to turn on the coffee, and logout
A script allows scheduled pump control with manual override.
Screen is shown on a dummy display and also on laptops throughout the house. Source available at http://code.google.com/p/infodisp.
Time to Eat

Wireless Remote (via X10) → x10monitor daemon → "Eat" Chime
Broadcast Message
Activity Screen Off (for 50 minutes)
Garage Entry Detection

- Light
- Motion
- Distance
- Garage door activation
- Garage door position
Detection Challenges

- Taking out the trash
- Leaving vs. arriving
Garage Door Position Detection

Garage Door Switch X10 Server
Garage Door Position Detection
Garage Door Position Detection
Garage Door Closed
Distance Detection

Distance Sensor → Arduino → X10 → Server
Arduino Distance Detection: Ping Ultrasonic Range Finder
The Solution
Arrival Reporting

- Turn on outside lights
- Issue message that someone has arrived
- Report who was in the car (what MAC address disappeared when the car left)
- Van has returned with Christine
moore's law, let me show you it.
